

## Sustainability

element® is created by a special powder coating for MDF. The Climate® powder coating contains no solvents or heavy metals; therefore it is a VOC free coating. element® is available on E0 MDF, a low formaldehyde emitting product which has a formaldehyde emission of less than 0.5mg/L, which is lower than the current Australian and New Zealand standards. All MDF is sourced from New Zealand grown sustainable radiata pine plantations.

## Care and Cleaning

Not only is element® remarkably versatile, it is also easy to maintain. To keep it looking pristine, just wipe clean with a damp cloth and a diluted solution of mild detergent in warm water. Refer to specification manual for full details.
